

Core boards (Non-powered AAC)

Core boards are single sheets of symbols or photos used to support expressive and receptive language skills.

Core boards can range in size depending on the users level of language.

Core vocabulary

 I	 help	 wash up	 stir	 oven	 I like it
 you	 more	 dry	 mix	 hob	 I don't like it
 yes	 stop	 chop	 sieve	 oven gloves	 sharp
 no	 finished	 grate	 burn	 pan	 hotter
 same	 different	 whisk	 melt	 knife	 colder

Fringe vocabulary

Core boards consist of core vocabulary which can often be used across various contexts and situations such as 'help', 'more' and 'stop'. They also contain topic specific or 'fringe' vocabulary which is related to a specific topic

Core boards can be useful to provide vocabulary for activities/sessions which more than one user will access

Considerations when making a core board include the number of symbols on the page, laminating finish, symbol/picture type

The consistent placement of symbols which are fixed on the page and do not move around is helpful for individuals with strong motor planning skills
