

Information Sheet

There are lots of different things that people can choose to do when they are not at school anymore.

For example, some people might go to university, others might get a job.

Researchers from Mencap and the University of York...

...want to know what you would like to do in the future,

and what you would not like to do in the future.

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

One researcher will chat to you.

They will ask about what you would like to do in the future by asking you to do three different activities.

Activity 1: Visual Conversation

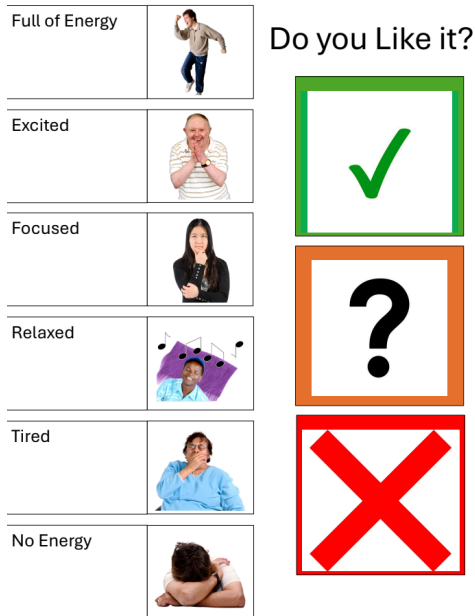

During the “Visual Conversation” activity, the researcher will ask you how you would feel doing different types of jobs.

They might ask you “why” you feel that way.

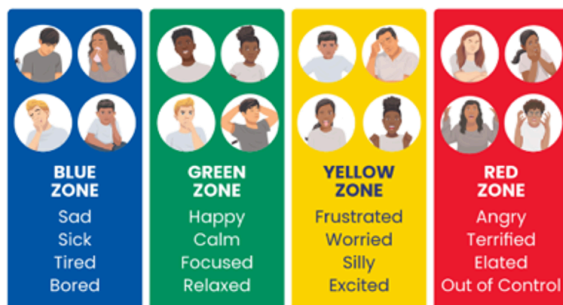

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

Activity 2: Energy Meter

During the “energy meter” activity, the researcher will ask you how you would feel doing different types of jobs. They will ask you if you like or do not like feeling that way. They might ask you “why” you feel that way.

Activity 3: Regulation Meter

During the “regulation meter” activity, the researcher will ask you how you would feel doing different types of jobs. They might ask you “why” you feel that way.

Each activity will take no more than 10 minutes to complete. After 10 minutes, the researcher may ask you how you felt when you were taking part in the activities.

Information and consent: What **you** need to know

Supporting Information

There are lots of different things that people can choose to do when they are not at school anymore.

For example...

Knowledge-based job:

uses thinking, learning, or problem-solving. You often work with ideas or information. Examples are teacher, nurse, computer worker, or scientist. These jobs need special knowledge, usually learned at a university.

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

Skills-based job:

uses skills learned during university or training (like an apprenticeship) to do jobs that other people would find hard. You learn by doing things. Examples are plumber, electrician, hairdresser, or cook.

People-based job:

helping customers. You talk, listen, and solve problems. Examples are shop-worker, call centre staff, hotel worker, or receptionist. You need friendly skills. Usually you do not need to go to university to get a people-based job.

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

Animal-based job:

working with animals. You help care for, feed, or train them. Examples are dog walker, vet assistant, farmer, or pet groomer. You need to love animals. For some jobs you may need a university degree but not for all.

Hands-on job:

using your hands to do work. You build, fix, or make things. Examples are builder, gardener, cleaner, or factory worker. You learn best by doing. These jobs need training or practice, usually gained during an apprenticeship or on the job.

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

Arts-based job:

using creativity to make or show art. You draw, paint, act, or design. Examples are artist, actor, dancer, or designer. You use your imagination. For some jobs you may need a university degree but not for all.

Admin Job:

helping an office run well. You answer phones, type letters, or organise files. Examples are receptionist, office assistant, or data entry worker. You need to be organised. For some jobs you may need a university degree but not for all.

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

Volunteer:

helping others without getting paid. It's a way to learn and give back. Examples are charity shop helper, animal shelter helper, or event assistant. Usually you do not need to go to university to volunteer.

Work from Home:

doing your job in your house, not an office. You use a computer or phone. Examples are writer, call centre worker, or online shop helper. You could usually do an admin or a knowledge-based job at home, but it would be tricky to work a people-based or skills-based job at home.

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

Start a business:

Starting your own business means you are the boss and what you do every day is up to you. You can start a business for lots of different things, like making cakes or crafts, or walking dogs. You decide how to work. And you get paid directly by your customers or clients.

College:

for people aged 16+ to learn skills and prepare for jobs. You can study courses like cooking, art, IT, or health care. It helps you get ready for work or more learning. Usually you either study 3 or 4 classes that you are interested in, or you can study just 1 subject you really like.

Contact information:

Email: adlib-project@york.ac.uk | Department of Education | University of York

University:

for learning more about a subject. You study courses like science, history, or business (or lots of other things). It helps you get a job or do research. You usually study for 3–4 years. You usually must have been to college or have some type of qualifications to go to university.
